DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 21 to 34 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 12 to 26 of copending Application No. 10/117,976. Although the conflicting claims are not identical, they are not patentably distinct from each other because the sole difference between the instant claims and the copending application is the second elastomer layer. However, it would have been obvious to one of ordinary skill in the art to modify the copending claims by the addition of a second elastomer layer in order to aid in the formation as each layer would have less channels or structure which is easier to construct for microfluidic devices.

Application/Control Number: 10/637,847

Art Unit: 1722

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 21 to 34 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 49 to 66 of copending Application No. 11/133,805. Although the conflicting claims are not identical, they are not patentably distinct from each other because the sole difference between the instant claims and the copending application is the second elastomer layer. However, it would have been obvious to one of ordinary skill in the art to modify the copending claims by the addition of a second elastomer layer in order to aid in the formation as each layer would have less channels or structure which is easier to construct for microfluidic devices.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 21 to 34 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1 to 9 of copending Application No. 11/056,451. Although the conflicting claims are not identical, they are not patentably distinct from each other because the sole difference between the instant claims and the copending application is the second elastomer layer. However, it would have been obvious to one of ordinary skill in the art to modify the copending claims by the addition of a second elastomer layer in order to aid in the formation as each layer would have less channels or structure which is easier to construct for microfluidic devices.

Application/Control Number: 10/637,847 Page 4

Art Unit: 1722

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert M. Kunemund whose telephone number is 571-272-1464. The examiner can normally be reached on 8 hours.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Yogendra Gupta can be reached on 571-272-1312. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
